## **MEDICATION INSTRUCTIONS: PRIOR TO YOUR TEST**

- 1. **Continue to take your medication for long-term conditions,** such as diabetes, high blood pressure, heart-related conditions, seizures or thyroid problems or antibiotics for infections. Do not discontinue your medication for these ongoing conditions. If you have any questions, contact our office at (410) 742-1567.
- 2. Stop taking the following medications 48 hours prior to the test: tranquilizers, sleeping pills, sedatives, antidizzy medication or other central nervous systems suppressants. (Examples of these types of medications would include but not be limited to VALIUM®, KLONOPIN®, Ativan®, Phenergan®, meclizine, ANTIVERT®, Dramamine®, BONINE®, scopolamine, BENADRYL®, INAPSINE®, ZOFRAN, robinul, COMPAZINE®, hydroxyzine, cough and cold medications that contain alcohol or cause drowsiness, etc.). If you have any questions, contact our office at (410) 742-1567.
- 3. Do not drink alcohol for at least 48 hours prior to the test.
- 4. If you are taking antidepressants, check with your prescribing physician to ask if you are allowed to discontinue this for **48 hours**. If you are not allowed to do so or are unable to do so, keep taking this medication.

## **DIETARY INSTRUCTIONS**

- 1. Do not drink any alcohol for at least 48 hours prior to the test.
- 2. If the test is in the morning, do not eat breakfast. If the test is in the afternoon, eat breakfast by 10 A.M., but do not eat lunch.

## **OTHER INSTRUCTIONS**

- 1. Do not wear any makeup at all, especially eye makeup.
- 2. Bring someone with you to drive you home.
- 3. Bring the completed "Dizziness Handicap Inventory" with you.
- 4. Bring your glasses if you need them for seeing at a distance.
